

IN THE CLAIMS

Please cancel claim 33 without prejudice and amend claim 24 as follows:

24. (once amended) An apparatus that communicates with a telephone communication system for processing a telephone call, wherein the processing performed by the telephone communication system comprises forwarding the telephone call, the apparatus comprising:

*Sub
B1*

a processor, in a wireless communication system, that receives information comprising a geographical location at which a primary communication device is located and that identifies a target communication device to which the call shall be forwarded based on the geographical location of the primary communication device; and

Q

a gateway mobile location center, in the wireless communication system and coupled to the processor, wherein the gateway mobile location center determines the geographical location of the primary communication device and delivers the geographical location to the processor and wherein the gateway mobile location center identifies the location of mobile subscriber units within the wireless communication system.
